

The future of music at

Sonja van Amstel

Rhenish

Another special evening – celebrating Gr. 8 and 9 music learners and their beautiful music contributions. We are extremely privileged to share the gift of music, to give of ourselves, and to make the music come alive meaningfully.

A very big thank you to every parent who entrusts their children to us to develop each learner to their full potential. It is a pleasure to work with such a large group of musicians. The orchestra will greatly benefit, especially from string instruments.

In as much as no two learners look alike – so it is with their interpretation of their chosen musical instrument and the unique sounds brought forth. The coming together of one's emotions, intellect and physical ability produces a well-balanced identity and versatility, which is very sought-after in today's society.

Khethani Woman's Wellness approached Rhenishers to help pack 1000 hygiene packs for high school girls in Lwand, Nomzamo and surrounding areas. Each hygiene pack container contained a face cloth, a bar of body soap, a bar of laundry soap, a roll-on and a pack of "Komani" reusable sanitary towels. The package also contained helpful information regarding the use of feminine hygiene products, organisations which assist in teenage pregnancy, and places to drop off a baby.

All the products were supplied, and Rhenishers gathered on Wednesday afternoon to form a very impressive production line and packed over 1000 packs within two hours. In the upcoming weeks, these packs will be distributed to girls in need. Thank you to each Rhenisher who came out to help those who do not have the basics we so often take for granted.

RHECO - CARING FOR THE

ENVIRONMENT

One of the better-known benefits of volunteering is the impact on the community. Volunteers are often the glue that holds a community together. Volunteering allows you to connect to your community and make it a better place. Even helping with the smallest tasks, such as a river clean up, can make the biggest difference for the tiniest creatures, such as bees. As a Stellenbosch community, Rhenish, Hoër Meisieskool Bloemhof and Paul Roos Gymnasium came together to better the community park at the Eerste River. RHECO has always believed in making a difference and encouraging others to give back, and we are thankful for all the learners who joined us with Bloemhof's clean-up event.

Thank you to Bloemhof for inviting us and allowing us to help make a difference in our community.

LIFE IS LIFE...LIFE IS SCIENCE

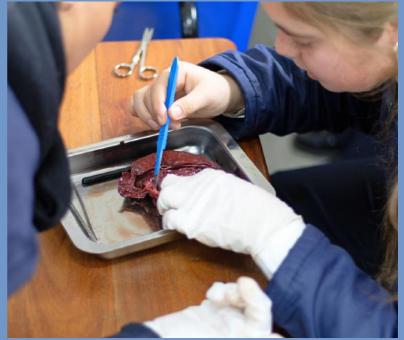

We took Life Sciences at Rhenish Girls' High School during the past couple of weeks and made it practical. Our Rhenishers experienced what the textbook's pictures look and feel like in real life.

Our grade 10s opened up hearts, and our grade 11s dissected kidneys and did a simulation of population counting exercise.

This learning experience was a good example that Rhenish, in the words of Dr Kroon, Acting Principal and Academic Head "does not only focus on teaching "hard skills" like math but also provides opportunities for our learners to observe, communicate, experience, analyse, and evaluate."
