We are phasing in the use of Chromebooks. This will allow our learners to develop crucial technological soft skills and allow them to engage, without difficulty, in interactive dynamic tasks. Each Chromebook MUST have a Chrome Education Upgrade (CEU) licence through which our school's IT support can define applications that students can use, and can disable or block applications during school hours that students don't need or that are potentially harmful. Please note that we are not recommending laptops as we are not in a position to support learner laptop devices yet.
